Title: Lord British in Space!

Author: The ROFL Times  
-----

12 Oct 08, Kazakhstan  
(Associated Press)

Lord British, AKA Richard  
Garriott, blasted into  
space aboard Soyuz  
TMA-13 today from the  
Baiknour space facility on

the Kazakh steppe, bound  
for the International  
Space Station where he  
will spend the next 10  
days.

Richard Garriott, the  
designer of Ultima and  
original Lord British, is  
the British born son of  
astronaut Owen Garriott.  
When told of his son's  
accomplishment, the 77  
year old former astronaut  
exclaimed, "Wot!! I told  
those idiots he would try  
to sneak aboard!"

Our Lord British plans to  
spend his days aboard the  
space station conducting  
experiments, avoiding  
capture, and playing  
Ultima Online "from really  
far out."

Long Live Lord British :)
